

Dear SCMA,

During the time that I was in need, thank you for being there to support me. I wouldn't be in my position right now without you. You will always be part of my success.

Nothing comes easy in life. Our achievements are the results of hard work, luck and the help of others with a good heart. SCMA has given me the privilege to be one of their scholars. With this, I strived to maintain my grades and get better.

Now, more than 3 years after graduating, I am still continuously working to improve myself. At work, I have participated in several activities and trainings which includes getting the fundamental knowledge that is needed for the job. Though this is the case, I still give myself the "work and life balance". For my hobbies, I focus on enhancing myself physically and mentally. I am learning French with the help of the Duolingo app. I am joining hikes in which I was able to climb two mountains last year. I am participating in running activities and even won a medal during our sportsfest. I have also started meditating in order to increase focus and release stress.

Regarding my job, I chose to join the Project and Program Management team of Arcadis. I am currently a Project Coordinator and have been part of several projects. We handle construction fit outs from the initiation to the close-out stage of a project. I have learned a lot of things, but I still see that the career I chose is broad and have many things in store for me.

Again, thank you for the opportunity that I was given. I am sharing below the pictures that I have for my stay in Arcadis.
